

Cloud repatriation is overstated

UII DATA REPORT 167 | FEBRUARY 2025

SUMMARY

The main reason enterprises are repatriating workloads from the cloud to their own data centers is due to spiraling costs. However, most enterprises are continuing to use several public clouds alongside on-premises facilities in a hybrid IT strategy. The movement of workloads from the cloud is not impacting overall cloud usage, and many workloads are still being migrated to the public cloud.

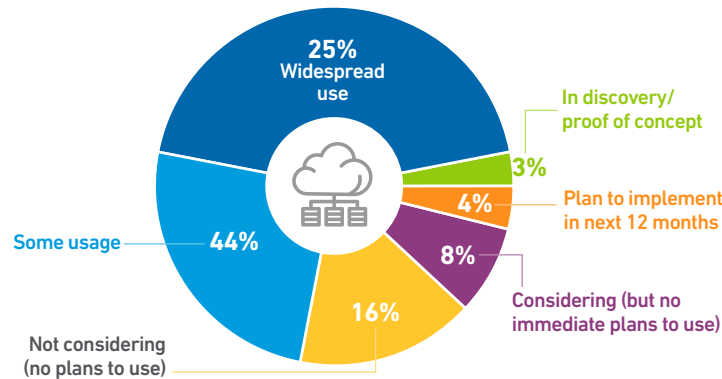

Results from the Uptime Institute Capacity Trends and Cloud Survey 2024 offer an insight into what drives migration to and from the public cloud.

ABOUT THIS SURVEY

The Uptime Institute Capacity Trends and Cloud Survey 2024 was conducted online from October 2024 to December 2024, and had 770 respondents. This report highlights some of the findings.

Operators say they have at least some public cloud usage

Which of the following best describes your organization's adoption of public cloud? (n=262)

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

Operator motives behind cloud migration vary

Why did your organization move applications from your own data center(s) or a colocation facility to public cloud(s)? Choose all that apply. (n=108)

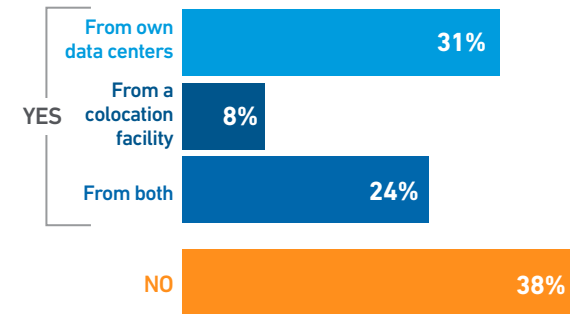

(*Other" responses are not included.)

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

Most operators moved applications to public cloud in 2024

In the past 12 months, has your organization moved any of its production applications from your own data center or a colocation facility to public cloud(s)? (n=186)

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

Movement to cloud is mostly permanent

In the past 12 months, has your organization moved any of its production applications away from a public cloud provider to a colocation facility or your own data center(s)? (n=155)

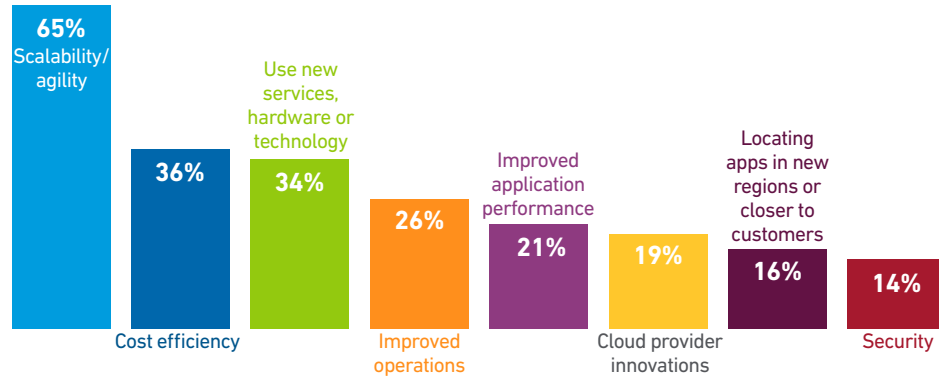

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

Cloud repatriation is overstated

Scalability viewed as top benefit for cloud migration

Which of these are the primary benefits behind moving applications from your own data center or a colocation facility to the public cloud? Choose no more than two. (n=110)

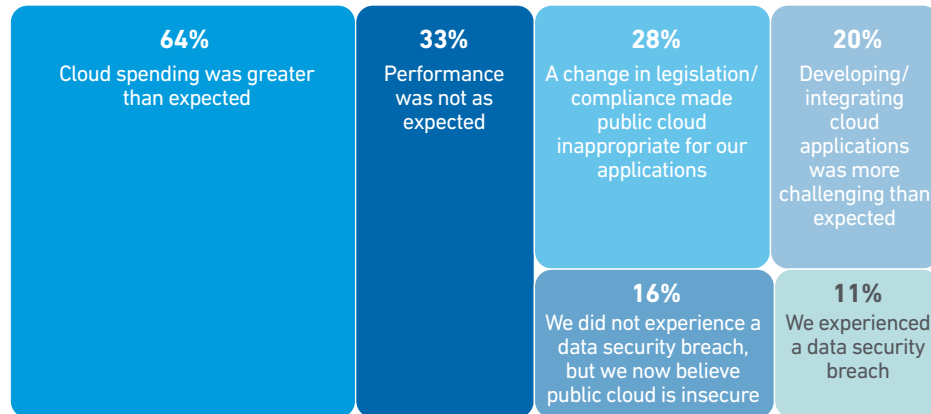

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

High costs drive cloud repatriation

What best describes your organization's reason for moving applications away from public cloud? Choose no more than two. (n=61)

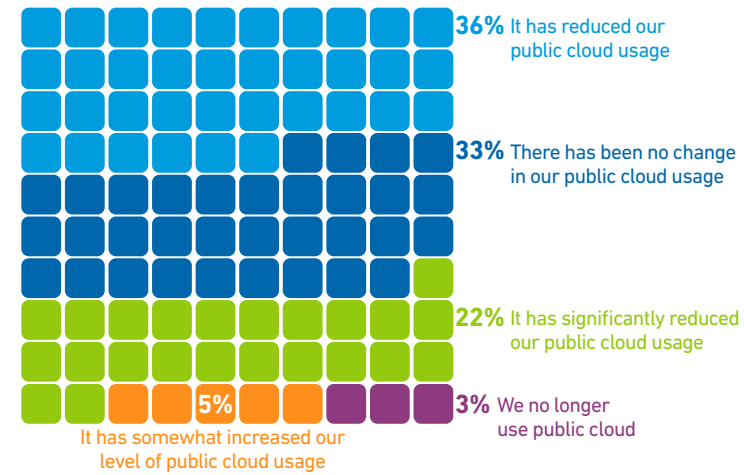

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

Only 25% are leaving or significantly reducing cloud use

Which statement best describes the overall impact on cloud adoption in your organization, as a result of moving certain applications away from the public cloud? (n=58)

UPTIME INSTITUTE CAPACITY TRENDS AND CLOUD SURVEY 2024

Majority of companies use multiple cloud providers

What is your organization's approach to hosting applications with cloud providers? (n=173)

About Uptime Institute

Uptime Institute is the Global Digital Infrastructure Authority. Its Tier Standard is the IT industry's most trusted and adopted global standard for the proper design, construction, and operation of data centers – the backbone of the digital economy. For over 25 years, the company has served as the standard for data center reliability, sustainability, and efficiency, providing customers assurance that their digital infrastructure can perform at a level that is consistent with their business needs across a wide array of operating conditions.

With its data center Tier Standard & Certifications, Management & Operations reviews, broad range of related risk and performance assessments, and accredited educational curriculum completed by over 10,000 data center professionals, Uptime Institute has helped thousands of companies, in over 100 countries to optimize critical IT assets while managing costs, resources, and efficiency.

Uptime Institute is headquartered in New York, NY, with offices in Seattle, London, Sao Paulo, Dubai, Singapore, and Taipei. For more information, please visit www.uptimeinstitute.com
